A combination of presentations on cyber safety topics, interactive group activities, and scenario-based learning:

- Deep dive into topics most relevant to the group
- Support for developing practical strategies participants can apply
- Extensive discussion and Q&A throughout the day
- Optional co-creation or reflection activities (e.g. identifying local risks or supports, co-creating new resources, etc.)

Suitable for training cyber safety champions (library and community workers, adult educators, and more)

Max. 25-30 participants

**Travel costs for in-person workshops vary, and can be confirmed at time of booking.*

The Cyber Safety Project has conducted the most comprehensive research on older adults and cyber safety in Ireland to date, revealing just how vulnerable many of Ireland's citizens feel online. Our expert team now offer **Cyber Safety workshops** designed to bring accessible, evidence-based digital safety education directly to your community or organisation.

Our sessions cover topics including **online scams, password security, privacy settings, staying safe on social media, and more**, tailored to your needs.

Whether you are a community group, library, employer, or service provider, we can work with you to deliver impactful cyber safety education that leaves participants feeling more confident and better protected online.

WHY PARTNER WITH US?

We are research-led, not off-the-shelf

Our content comes directly from comprehensive studies on the cyber safety landscape and varied digital newcomer groups, with every session grounded in current best-practice advice.

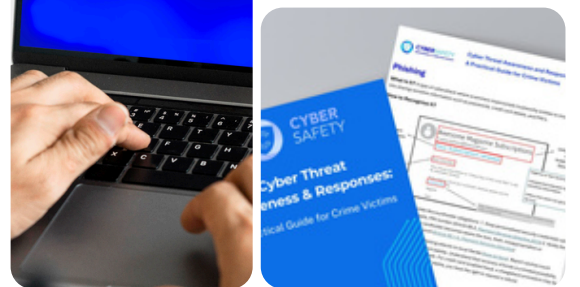

Workshops tailored to your needs

We adapt our delivery, language, and case studies to suit each group, and we are happy to discuss your specific needs.

Accessible and inclusive by design

All of our materials are designed for plain language, low digital literacy, and diverse needs.

Dual expertise: research and community engagement

Our team combines academic rigour with hands-on experience delivering to diverse communities across Ireland, making complex security topics both accessible and interesting.

Supporting Ireland's digital future

Partnering with Cyber Safety positions your organisation at the forefront of digital inclusion, contributing to a cyber safe Ireland ahead of the Government's 2030 digital service targets.

Ready to bring Cyber Safety to your organisation?

Whether you are looking for a one-off briefing, a series of community workshops, or a fully tailored programme, we would love to hear from you. Review our pricing, or get in touch at cyber-advice@cyberskills.ie to discuss your tailored workshop needs.
